

About us

The Congress Centre is a structure Mantua has been waiting for a long time. Now it has become a reality. Mantua now has the possibility of presenting itself both on the national and international scene with an attractive and welcoming structure designed and equipped for congresses, conferences and meetings of all types causing a strong sense of unity through a vast range of events.

In any case, it will be an important structure in itself for any civil, economic, political, cultural need of both Mantua and its province. For all of us who need a place and a space in which to meet in Mantua.

The Congress Centre can seat more than 800 people in total. It is composed of a multifunctional central area, the "l'Ottagono" Auditorium with 400 seats in all and several other rooms, halls, meeting and conference rooms differently shaped and equipped with the most modern interactive systems.

The Congress Centre also contains a box office, translator's booths and a control rooms with ancillary and complementary services. Wide areas are available for catering, for shows, exhibitions and for any other events.

This modern structure is provided with a full time bank outlet both for internal and external business. A bar/meeting point is also available. A large and atmospheric arcade connects the Congress Centre to Largo Pradella, Piazzale Mondadori and the green, treelined open space at the front.
